

Elias Keshishoglou

1999 Las Encinas Ct
Los Gatos, CA 95032

- * 12 Years Embedded OS and Driver design.
- * 7 Years Managing 5 as Director
- * 3 Years Consumer Space, 3 Years Network, 6 Years Computer .
- * 5 Years Linux Kernel and drivers (PPC, Intel, MIPS), 2 as primary user OS.

My engineering experience extends 15, most of this time at startups, where my ability to grasp complex problems quickly and resolve them enables constant forward progress.

I have a successful track record of setting up an effective teams, managing to the schedules and shipping products. I have been called upon at many different companies to accomplish these tasks and have been successful every time.

My proven track record of building effective engineering teams using positive people centric mentoring and a hands-on, team oriented management style has also ensured success.

I am self-initiated and self-directed; able to work effectively with cross-functional teams in driving responsibility to results. I enjoy the challenge of determining new methods and directions that will provide increased productivity and efficiency.

I would be very interested in learning more about your opportunity and how we can apply my skill in a productive fashion.

Sincerely,

ELIAS KESHISHOGLOU
